423-229-1911

Next Meeting on February 10th, 2011

Marc Strand speaks out about
Polymer Chemistry

Directions to the Eastman Lodge

Use I-26 – Take Exit 3 for Meadowview Parkway.

Turn west, going under I-26 on Meadowview Parkway \ Reservoir Road

The name of the road will become only Reservoir Road

Go 2.3 miles and turn right on Bays Mountain Park Road

You should see a sign for Bays Mountain Park

Take the right fork in the road in 0.2 miles to the Lodge

Shawn Dougherty
2011 NETS-ACS, National Chemistry Week Coordinator
Eastman Chemical Company
Group Leader, Chemistry Research Lab

20 Years of NETS-ACS National Chemistry Week

NETS-ACS has hosted the “Celebration of Chemistry for Fourth Graders” for the past 20 years. We will review the history, the awards, the impact, the sponsors and our challenge to make this year “The International Year of Chemistry” the best year ever.

Bio

Shawn Dougherty took her Ph.D. in synthetic Organic Chemistry from Gary Keck at U of Utah and began her career at Eastman in the Cellulose Esters Research lab. Within her first month of work she was asked to join a panel of John Hyatt and Buck Buchanan to discuss careers in Chemistry as part of the NCW program for ETSU. The next year, in 1991, she was NETS-ACS National Chemistry Week Coordinator and with the help of a number of volunteers, began the first Fourth Grader’s Celebration of Chemistry. 2011 marks the 20th consecutive year of this event and Shawn will use this opportunity to review the program and in honor of the many volunteers. Shawn is the group leader of the chemistry Research Lab in Eastman Research Division. In addition to NCW coordinator, Shawn has held many posts in the local section including treasurer, public outreach officer and alternate counselor. 2011 marks her 25th year as a member of the ACS.
